- **Programming Language, interface**: JavaScript, Web-API
- **Database Management system**: MySQL, MongoDB, IndexedDB
- **Web development platform, frameworks, techniques, and others**: Node.js, express, Object Oriented Programing, Model View Control, Object Relational Mapping, Progressive Web Application, React.

Projects

Dank Reviews

https://bootcamp-project2-uw-dev.herokuapp.com/ || https://github.com/bayleyegn100/Dank-Reviews
- This website is created to have users review memes and give their inputs on the memes. You can only review memes if you have an account. Once you submit a review, you can view your reviews on your profile.
- **Technologies used**: NPM packages (Reddie.images, Sequelize, Bcrypt, DOTENV, MySQL2, Express), Bootstrap, Heroku, MySQL, Google Fonts.

Random Acts of Kindness

https://github.com/bayleyegn100/random_Acts_Of_Kindess || https://bayleyegn100.github.io/random_Acts_Of_Kindess/
- The Random Acts of Kindness app offers all volunteer Seattleites to connect with local charities and organizations based on their interest like in education, public safety, culture and others.
- **Technologies, frameworks, and languages used**: HTML, CSS, Bulma, JavaScript, Web-API.

Event Scheduler

https://github.com/bayleyegn100/Event-Scheduler-|| https://bayleyegn100.github.io/Event-Scheduler-/
- Most event scheduler calendars are designed for 24 hours, this one is intended only for "work hours" from 8 AM to 4 PM.
- **Technologies used:** HTML, CSS, JavaScript, Moments js.

Employee Tracker

https://github.com/bayleyegn100/Employee-Tracker ||
https://drive.google.com/file/d/1ETgE5laXORdedFW4FbBiq0I8-Aq4zAo9/view
- This app can help any organization to view, update, and delete employees, their role and department when necessary. It is designed to incorporate as much as the users demand. It is time saving, easy to use.
- Technologies used: HTML, CSS, Javascript, Node Package Manager (npm), express, file system, node.js..

Offline-Online-Budget-Tracker

https://github.com/bayleyegn100/Offline-Online-Budget-Tracker || https://test-2314.herokuapp.com/
This application helps the user to track their budget during online and offline mode.
- **Technologies used:** Indexed DB, JavaScript, Node Package Manager (npm), express, Mongo database, Mongoose, node.js and other node.js frameworks.

Workout-Tracker

https://github.com/bayleyegn100/Workout-Tracker || https://fast-forest-21283.herokuapp.com/
- By using this app it is possible to track the name, type, weight, sets, repetitions, and duration of the exercise done by a user. A user can add exercise to the most recent or to a new plan.
- **Technologies used**: JavaScript, express, Mongo database, Mongoose schema, node.js.
